Kole is 9 years old and currently in 4th grade. Having been with us since 1st grade, he's one of our longest standing members at CC. Kole's favorite thing about CC is playing outside or in the gym. At first, he thought his favorite school subject was math, but he quickly changed his mind to reading. His reasoning was, it's not nearly as much work as solving math problems. Kole's favorite book that he's read recently is Holes, however he's never seen the movie.

Kole's favorite thing to do outside of school is play baseball. His best accomplishment in sports (specifically in his years playing baseball) is avoiding losses since 2nd grade! What an amazing streak! Kole's favorite position to play is pitcher but he's also okay with shortstop. Although he doesn't know his batting average, he's confident that it's a good one.

For now, Kole isn't sure which colleges are good or which one he should go to, but he is certain that he will attend college someday.

Kole's one piece of advice to a kindergartener would be "how to multiply". After clarifying what the question actually meant, Kole's life advice is to "not do dumb things on the playground equipment."

## Four Leaf Clover Stamp Painting

Four leaf clover stamp painting was a messy blast for the kids! They all learned how to bend pipe cleaners into clover shapes to make their paintings. Some kids went the extra mile and started painting with their hands! Experimenting with the different textures was a fun way to paint! They were mixing the greens, deciding what green they liked best for their own personal masterpiece. It was a fun experience for everyone!

“After showing me, I think I can make my clover!” -Anna

“It was fun, I had Shrek hands!” - GiGi

“I loved making a big mess” - Betania

# Tennis Circuit

This introduction to tennis went really well! The kids were curious and engaged from the start, as well as eager to try out the different stations. They enjoyed experimenting with the tennis equipment and found the challenges both fun and exciting. The structured rotation helped them stay focused, and the transition into group play allowed for more natural, free-form interaction with the game. It was great to see them develop their coordination, teamwork, and enthusiasm for tennis.

For this activity, Erica set up a tennis circuit with three stations, each designed to introduce kids to different tennis skills in a fun and engaging way. After dividing into small groups, the kids rotated through the stations every five minutes. Once we went through a few rounds, we transitioned into a more open play format, where Erica served the ball, and they took turns hitting it back or played quick 1v1 matches.

**"Playing against my friend was my favorite part! I want to do it again!" -Tran**

**"I like the challenge of hitting the ball against the wall as many times as we could. It was hard at first, but I got better!" -Elaysia**
